

ROADMAP FOR PARENTS OF BABIES INFECTED WITH ZIKA BEFORE BIRTH WHO APPEAR HEALTHY

This document should be used as a guide to discuss the screening and testing your baby may receive with his or her primary care provider. Each baby is different, and it is possible that your baby may need more tests or fewer tests.

► The tests and screenings your baby will likely receive before leaving the hospital include:

- Comprehensive physical exam
- Head ultrasound
- Standard newborn hearing assessment
- Zika virus laboratory testing (blood and urine)

If your baby does not pass any of these screenings, you may be referred for additional follow-up.
